AUTOMATED STORAGE SYSTEMS

design and production

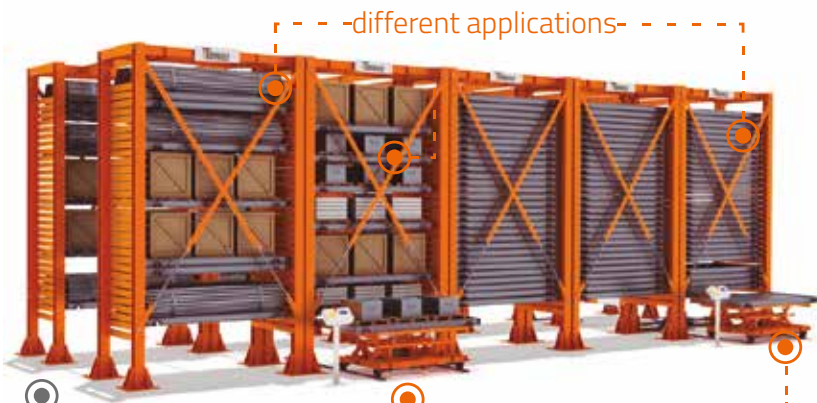

LOGITOWER
DOUBLE TOWER

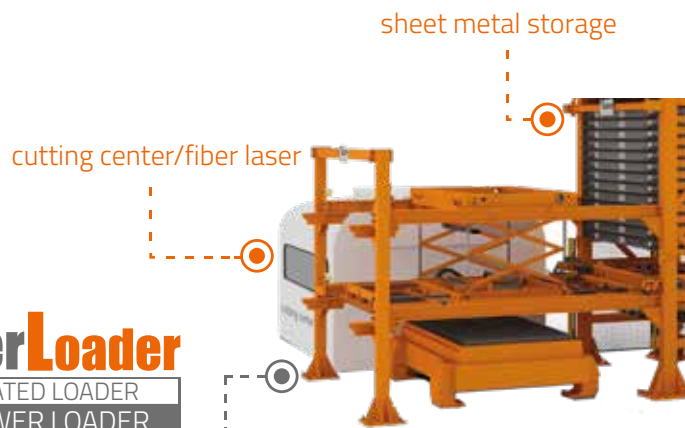

- 1 storage towers height up to 20 m
- 2 shelves/trays customized design
2x1m, 3x1,5m, 4x2m, 6x2m
- 3 extractor load capacity up to 8 t
- 4 loading station
- 5 control panel
- 6 second loading/unloading station

Software and LT10N control system

LT10N

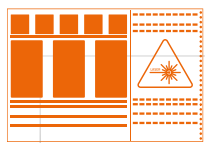

LT10N storage management system with 10" screens allows full control and management of inventory, as well as system handling from the HMI panel.

LT ENTERPRISE

Advanced storage management system with +17" screens including full integration with external ERP & WMS software systems, based on SQL/Windows architecture.

LT 10N control system.

- database and inventory management
- integration with external ERP and WMS systems
- adaptation to individual needs available
- users and access control functionality
- HMI graphical interactive interface
- integration with peripheral devices such as barcode scanners, electronic scales, etc.
- order picking processing
- height measurement for storing containers in the optimal packing density
